## FedRAMP Overview

FedRAMP is a government-wide program that provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services. This approach uses a “do once, use many times” framework that will save cost, time, and staff required to conduct redundant agency security assessments.

The objective of FedRAMP is threefold:

- Ensure that information systems/services used government-wide have adequate information security;
- Eliminate duplication of effort and reduce risk management costs; and
- Enable rapid and cost-effective procurement of information systems/services for federal agencies.

## General Guidelines

1. The FedRAMP logo refers to the FedRAMP name and FedRAMP approved logo detailed in this document.
2. The FedRAMP PMO will authorize an entity's ability to use the FedRAMP logo. The authorization will detail the specific circumstance(s) when an organization can use the FedRAMP logo.
3. The FedRAMP logo may never be used in any manner that would imply government endorsement of a company, its products, or its services. Neither the logo nor the FedRAMP name may be used in any other company name, product name, service name, domain name, or website title.
4. The logo may not be altered, cut apart, separated, or otherwise distorted in perspective or appearance.
5. The logo may never be used in a manner that would disparage FedRAMP or any government body.
6. Abbreviation of the Federal Risk Authorization Management Program must always appear as FedRAMP.
7. Authorized organizations are responsible for the proper use of the FedRAMP logo as outlined in this document. This includes but is not limited to the use by any representatives, such as advertising agencies, system integrators, resellers, partners, etc.

## Logo Usage

### Clear Space

We require the minimum amount of clear space to be equal to .25% of the height of the logo you use. No other graphic elements, such as text or images, can appear in this area. We require this clear space since the Promotional Logo frequently appears within materials using complex imagery, such as other logos, graphic devices, and text.

### Grey-Scale Printing

If gray-scale printing is used, the logo must be printed using the color scheme below.

#### Gradient

Secondary Blue  
CMYK: 0/0/0/85 RGB: 0/50/98

Primary Blue  
CMYK: 0/0/0/100 RGB: 0/31/71

#### Logo Text

Primary Red  
CMYK: 33/26/23/0 RGB: 174/176/181
